Introduction

Section 20.1 of the Illinois Environmental Protection Act instructs the Illinois EPA to identify sites that generate, treat, store or dispose of hazardous wastes and to report the types and quantities of hazardous waste involved. Hazardous waste is defined by the Resource Conservation and Recovery Act (RCRA), which gave the EPA authority to control hazardous wastes from "cradle to grave."

This publication makes no attempt to analyze this data. Analysis is contained in a companion publication: Hazardous Waste Generation and Management: 1995-1997 -- A Summary of Reports to the Illinois Environmental Protection Agency. It may be reviewed through the state library system or obtained from the Agency at the address on the title page or from our Internet site at <http://www.epa.il.us>.

Generators that shipped hazardous wastes

This section lists the Illinois companies that generated and shipped off site for further management hazardous waste produced at the installation.

At least one waste form code is listed with each site, that identifies each waste type. Waste form codes can be found in Appendix B.

Generators that stored hazardous wastes

This section lists the Illinois generators that stored hazardous waste generated either during 1997 or in prior years.

Generators that managed hazardous wastes on site

This section lists Illinois firms that generated and managed hazardous waste on site during 1997 in RCRA-regulated and RCRA-exempt units.

At least one system type code is listed with each site, that identifies each management category. Management categories can be found in Appendix C.

TSDFs that managed hazardous wastes

This section lists Illinois TSDFs that received from off site and managed hazardous wastes during 1997. Some listing may be captive facilities that received and managed only those wastes generated by parent or other related organizations.

At least one system type code is listed with each site, that identifies each management category. Management categories can be found in Appendix C.

How listings and data are arranged

Listings and data within each section include the Illinois EPA and U.S.EPA identification numbers, the organization name and address, a waste form or system type code, and the tons of waste associated with this code.

The Illinois EPA's 10-digit identification number is the top number associated with each listing. It organizes the listings first by county, then by municipality. The first three digits identify the county, the next three the municipality, the final four a specific site. No pattern exists within communities, as site numbers are assigned on a "first-come, first-served" basis. County codes are listed in Appendix A.
